Re: SEPV Mojave West Solar Project

Dear Ms. Mayes:

California Unions for Reliable Energy ("CURE") is pleased to announce its support for the SEPV Mojave West Solar Project. The Project would involve construction and operation of a solar photovoltaic power-generating facility with a capacity of 20 megawatts of electricity on 180 acres of land in the eastern Kern County Mojave area. The facility would consist of approximately 89,000 solar modules and support structures, direct current to alternating current inverters and transformers, among other electrical equipment, interconnection equipment and security improvements. CURE supports projects, such as the SEPV Mojave West Solar Project, that provide good jobs and sustained viability and growth of California's renewable energy industry. CURE believes that construction and operation of this renewable energy project will benefit the State of California, Kern County, and communities in the vicinity of the project site.

Sincerely,

Tanya A. Gulesserian
